

CSM Advisory has been established to provide developers, investors, lenders the required guidance to enable them achieve the twin objective of investment – ROI and Sustainability. CSM Advisory is the brain child of 3 experienced professionals in built environment who seek to bring their combined expertise to bear in the service of organisations focused on achieving the ROI for their building projects over the investment period.

We focus on Development, Sustainability and FM Advisory & Training.

We provide strategic advisory including early/pre-design stage feasibility studies, project design studies, valuations and Highest best Use analysis.

Our team include EDGE Experts who can provide support services in the areas of the design and building of sustainable green building solutions.

We possess in-depth knowledge and expertise in all FM processes from design phase, handover, on-site maintenance and services to portfolio lease administration, as well as training for on-ground teams for key clientele.
