ARKAN for facade solutions standards are
VISION Becoming one of the top facade solutions providers in Egypt & Middle East

“ Quality , Professionalism & Commitment ”

MISION lead and deliver top quality our solutions through safe, innovative and sustainable practices using our expertise in the design, manufacturing and installation of all facade solutions components.

ARKAN for facade solutions is an Egyptian manufacturer and supplier of facade solutions. We are dedicated to manufacture, supply, install & finish GRC, GRP, GRG, EPS & Precast units

ARKAN for facade solutions works on a range of commercial, entertainment and residential projects, Our involvement from design and develop received designs to manufacturing and contracting works, We strives to lead and deliver top quality Facade solutions through safe, innovative and sustainable practices .

GRC Glassfiber Reinforced Concrete

it is one of the new cement-based materials in which glass fibers are dispersed leading to increase in the tension and impact strength

80% lighter than precast concrete panels
Experience with more shapes & formliners
High quality in-house mould production
Wide choice of colours & textures

GRP Glassfiber Reinforced Plastic

it is a composite of fiberglass reinforcements in a plastic (polymer) matrix.

GRP an attractive, light weight, and durable material with one of the highest strength to weight ratios available for component mats

EPS Exp. Polystyrene Acrylic Coated

it is polystyrene (EPS) insulating facades units with weather resist Acrylic top coating finish

more effective and recommended as its benefits (hi-speed, light weight & more economic)
