Hall 3 - G40

Why Us

Technical Accuracy

Precision modeling and data-rich BIM deliverables.

Client-First Customization

Projects are tailored to each client's unique goals.

Lifecycle Performance

Model the building lifecycle from concept to operation.

“

Precision in
every model.
Clarity in every
workflow.

What We Do

We turn ideas into inspiring spaces through innovation, precision, and timeless design.

Our Services

1. BIM Modeling

Coordinated digital models for informed decision making.

2. Interior & Exterior Design

Functional, aesthetic spaces tailored to each project.

3. Execution (Shop) Drawings

Accurate documentation for smooth project delivery.

4. Digital Library Management

Organized standards-based libraries for efficient workflows.

5. Workflow Automation

AI, Dynamo, and Revit API solutions that reduce manual effort.

WHAT YOU WILL DISCOVER WITH

ArchiUs

Live BIM Demonstration

See an integrated project workflow from concept through execution.

Immersive VR Experience

Explore the showcased project in an interactive virtual environment.

Custom Revit Tools

Discover internally developed tools built with AI, Dynamo, and the Revit API.

Internal ERP Platform

A connected system for requests, approvals, time tracking, and team communication.

Who We Are

ArchiUs is a team of BIM professionals helping architecture and engineering firms unlock the full potential of information modeling.

Our focus on quality and innovation helps clients achieve better coordination and faster, more reliable project outcomes.
